Note: Course Selection: The courses that are listed above are **examples** of curriculum areas that may be linked to occupations in the nine career pathways of the National Occupational Classification (NOC) System. The NOC System provides detailed information on over 27,000 occupations throughout Canada. (www23.hrdc-drhc.gc.ca)
Students should explore a variety of occupational areas that are of personal interest to them. Knowing the educational requirements and the kinds of work involved in different occupations will help you make more informed decisions about which courses to take throughout high school. Discuss your course selections with your parents, friends, and teachers to ensure the best possible choices. **Informed course selection** will provide you with a good foundation for your present and future career plans. This **Education and Career Planner** is a critical document in your **Employability Skills Portfolio** and should be updated annually.
